Customer Data

Company: Suceava Municipality

Contact person: Herr Mr. Dan Dura

No of employees: > 1000, No of freelancers: none

Annual Revenue: keine Angabe

Description:

Suceava Municipality is a local public authority strongly involved in laying down sustainable development policies and improving the life quality of its citizens is a major concern.

Increased effort for an efficient energy production and consumption is a priority for Suceava Municipality, which assumed an active role in promoting energy efficiency and renewable sources of energy.

Short Description

The Association RELIANS CORP SRL, Iasi, with SPES CONSULTING SRL, Italy, have realized for Suceava Municipality the Sustainable Energy Action Plan (SEAP) and 3 priority project outlines, as to implement the „Swiss-Romanian Cooperation Programme in order to reduce economic and social disparities within the Enlarged European Union, Focus Area 4, Objective 1”.

The SEAP was realized based on EEA – European Energy Award management tools, a method that is designed to ensure a reduction of energy consumption by acting in all areas of general interest.

SEAP is the methodology according to which Suceava Municipality will reach its objectives by 2020, using the results of BEI (Baseline Emission Inventory) in view of identifying the best fields of action and the best existing opportunities in order to meet the local objective of reducing CO2 emissions. SEAP defines the concrete reducing measures, together with the time frames, assigned responsibilities and estimated budgets.
